A GOOD ROAD AND A
NEW CHEVROLET SIX
FOR REAL PLEASURE.

Wherever You Find Autos, there You Find
a New Chevrolet Six.

Prosperity Bonds in Demand.

Stony Plain is rapidly acquiring the enviable reputation of being the one town where prosperity bonds are in demand by the various places of business, according to a first-class authority. Mr. Glen Carmichael, a prominent member of the local group who are advocates of and believers in the social credit theory, in an interview in The Sun office on Friday last, stated he has had all his requirements such as gasoline, hardware, haircuts and groceries met, by paying for these with prosperity bonds. Mr. Carmichael recalls the policy of the local paper in publishing a list of Provincial Government services for which the said Government refuses to accept payment for in any other medium than coin of the realm. The present addition to this list is said to be the refusal of the provincial secretary's department to accept prosperity bonds in payment of motor car licenses. Neither will scrip be taken in payment for University accounts, school text books supplied by the Government, fishing licenses, purchases from the King's printer, provincial licenses, Government school fees, purchases from liquor vendors and beer licenses.

Mr. Carmichael suggested that the local paper print, instead, the names of the business places where prosperity bonds are accepted, and when asked by the Sunman for this list, Mr. Carmichael mentioned a number of places of business on Main St. where his needs were supplied and in payment of which prosperity bonds were accepted.

New System for Schools.

The new form of school organization authorized by the Dept. of Education was inaugurated on Monday in the high and public schools throughout the province.

Heretofore grades 1 to 8 have formed the public schools and grades 9 to 12 the high.

Under the new form the elementary schools consist of grades 1 to 8.

Grades 7, 8, 9 now constitute the new unit called the intermediate. High schools will include 10, 11 and 12 only.

It will be noted that grade 9 is no longer a part of the high school organization.

The high schools start with grade 10; and those pupils only will be eligible for admission to these schools who have passed the complete grade 9 exams.

The Dept. of Education purposes holding but 2 exams between grades 1 and 12.

The first of these exams will be at the end of grade 6, and the 2nd at the end of grade 12.

All promotions, from grade 1 to the end of grade 8, will be on the recommendation of teachers of the local system.

The same rule will hold good for promotions from grades 10 and 11.

The only grade in which material changes in the course of study have been made is grade 9. The grade 9 course is wholly different to what it has been in the immediate past. The subjects for grade 9 include English, social studies, general mathematics, general science, health education and physical training.

The Need For Flexible Loans

More elasticity is needed in mortgage loan agreements covering security in Western Canada in future than has been provided for in the past.

In future agreements some cognizance should be taken of the possibility of the intervention of Providence in the affairs and operations of the mortgagor resulting in complete or partial inability to meet maturing annual payments of principal and interest due to no fault of his own.

Experiences of the past few years of general economic and agricultural depression have demonstrated that the terms under which loans have been made in the past have been based on the false premise that the farmer is in receipt of an assured and steady income, such as, at least in theory, is enjoyed by the salaried man.

Such agreements provide for the payment on a specified date each year of a portion of principal and one year's interest on the loan, without any provision for postponement of either principal or interest in the event of crop failure which may ensue from any one of a number of causes over which the mortgagor has no control whatsoever.

The conditions under which agriculture has labored in Western Canada during the past five or six years, resulting in the piling up of mortgage indebtedness and now necessitating debt adjustment on a wide scale, have amply demonstrated the futility of agreements which make no provision for a measure of relief in periods of total or partial crop failure.

There is no doubt that much of the work and expense of debt adjustment now in progress could have been avoided had agreements, under which these debts have been pyramided, even to the extent of wiping out the mortgagor's equity, been drafted when the original loans were made, to provide for automatic reduction in the amount of repayments in years in which, because of the operation of natural forces, the mortgagor had little or no income and for an increase in payments in years of bounty, when much of the indebtedness would have been repaid.

Not only would endless negotiations with loan companies and the work of debt adjustment tribunals have been materially lessened, but the debtor would have been saved years of mental torture and harassing anxiety as he watched a juggernaut of accumulating interest threatening to crush him and pictured the arrival of the day when he and his would be disposed of all they ever owned.

A form of agreement that would eliminate this dread which must necessarily haunt the days and nights of the honest debtor who does his best to meet his obligations and is only defeated because of circumstances over which he has no control, would be a godsend to all who have occasion to secure loans in the future.

It should be possible to draw up an agreement that will provide for repayment of principal sums in accordance with the ability of the mortgagor to pay based on actual returns from honest effort and yet, at the same time, protect the lender from loss due to human incapacity or the machinations of dishonesty.

It is interesting to note that agreements incorporating the principle of paying more in times of plenty and less in times of dearth have been adopted and put into effect with apparent success in Australia, where in certain sections of the country the sheep ranchers are subjected to severe drought ravages to the extent at times of wiping out whole flocks. In that country the same principle has been made to apply also to short term credits supplied by the banks.

If such a policy can be worked out successfully in Australia there appears to be no reason why it should not operate equally well in Western Canada.

It is to be hoped that some arrangement for greater elasticity in future loan terms can be made by members of debt adjustment tribunals who are in frequent negotiation with the loan companies at the present time.

That the necessity for something of the kind exists was referred to recently in an address by S. P. Grosch, chairman of the Saskatchewan municipal debt adjustment organization, when he said: "I find there has been a rigidity in our system of making loans to farmers that has not sufficiently taken into consideration the wide fluctuations in revenue to the farmer between years of plenty and years of scarcity. Provision should be made for greater flexibility."

The fact that at least some authorities have come to this conclusion strikes a hopeful note that something more commensurate with Western conditions will be arranged for in the future.

Special Prize

A special prize of \$25 will be awarded for the best finished Hereford steer at the Saskatoon and Regina spring fairs in 1937.

Highway tolls were once paid with cash, but now with blood.

How Easter Date Is Set

The present rule for determining the date of Easter was adopted by the Council of Christian Churches in 325 A.D. This rule says that Easter shall be on the first Sunday following the Paschal full moon, on or soon after March 21.

Liquid Air As Fuel

Newest Energy For Motors Being Tested in Japan

Liquid air serves as fuel for one of the strangest motors ever built, which now is operating in a Japanese laboratory. Should it fulfill the hopes of its inventor, it may bring about a revolution in motive power for vehicles of the land, sea and air. In contrast with the fiery temperatures of a conventional internal-combustion engine, which is somewhat resembles, the new motor operates at temperatures from 250 to 350 degrees below zero. Its small fuel tank holds ordinary air that has been chilled until it is transformed from a gas into a liquid like water. The difference in temperature between this extraordinary fuel and the surrounding atmosphere provides the energy to run the motor. From the fuel tank, the liquid air passes to a chamber where it is allowed to absorb heat from the exterior air. In doing so, it turns to vapor, much as water turns to steam when heated in a boiler. The pressure of the expanding air drives pistons in a pair of cylinders. Through an elaborate system of auxiliary apparatus, virtually all the energy contained in the liquid air is reported to be recovered. Because of its efficiency and small bulk of fuel required the inventor foresees eventual application of his motor in automobiles, trains, ships, and especially in airplanes. The small bulk of fuel required would also be an important advantage in aircraft. — Popular Science.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of bile into your bowels daily. If this bile isn't flowing freely, your food doesn't digest. Just digests in the bowels. Use **Little Liver Pills** to get your stomach. You get constipated. Bile flows into the bowels, you feel sore, sick and the world looks black.

A new bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes some good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you make the bile flow freely. They're the world's best pills for the liver and bowels. Ask for Carter's Little Liver Pills by name! Satisfactorily refuse anything else. See.

Centipede To Blame

Caused Breakdown At Electric Power Station In India

Peshawar City, on the North-West Frontier, India, was thrown into complete darkness by a centipede. For three successive evenings the city lights failed. On each occasion a breakdown occurred at the electric power station, but experts could not detect the cause. All their investigations—even to a rapid inspection of underground cables—failed to explain the mystery. Then on the fourth night, a lineaman found a centipede on the wires which carry the electric current to the city. A number of its legs were singed. This was taken as sufficient evidence of its previous expeditions.

No Wonder It Hurts

The tail of the cat is part of the backbone, or spine, which is made up of a number of little knots of bones joined together, just like our spine; and pussy's spine also is joined to her brain. You will understand now why puss cannot bear to have her tail pulled and why she growls and scratches when the baby drags at it. No wonder for it affects her brain and half maims her for a minute. — Our Dumb Animals.

MOTHER SAVED THE DAY...

DON'T RISK FAILURES...

It's easy to avoid baking disappointments if you use dependable Magic Baking Powder. Every spoonful assures full leavening power. That's why so many of Can-

ada's noted cooking authorities always use and recommend it! And this quality baking powder costs so little to use—actually less than 1¢ per baking! Order Magic from your grocer—today!

Made in Canada

Finds Thriving City

British Government Official Sees The Settlement While Flying

The lost city of Yong-Peng, inhabited by 5,000 Chinese and situated in the midst of the Malayan jungle, was found by a British government official while flying over the district.

The official, who was employed in the Land Office of the native Malay state of Johore, saw a large settlement in the heart of the jungle, which he did not recognize. Next day he drove to it, and to his amazement discovered that it was the lost city of Yong-Peng.

The government was unaware of the existence of the town, although it has been a thriving agricultural centre for nearly ten years.

The inhabitants, who are Chinese, work as rubber planters on an area of more than 10,000 acres. They have built the town as their headquarters, and provided it with all the amenities of a native civilization.

SELECTED RECIPES

DATE SHORTBREAD

(Mixture 1)

1 package dates (stoned) 2 cups 1 cup boiling water
1 cup brown sugar
Method: Boil together until soft. When cool, add 1 teaspoon vinegar or lemon juice.

(Mixture 2)

1 cup shortening
3 cups Purify Floured Oats
2 cups Purify Flour
1 teaspoon salt
1 teaspoon soda
Method: Sift flour with salt and soda; add Purify Oats and cut in shortening.

Divide Mixture 2 into equal parts. Place half of it in oiled baking pan. Spread Mixture 1 over this, and then spread remainder of Mixture 2 over date layer in sandwich-like fashion. Bake in slow oven of 300 degrees for 40 minutes.

Interested In Alaska

Don Skuse has returned to Juneau, Alaska, and declared he was stopped by every traffic cop on Broadway and Fifth Avenue, New York, but not for infractions. The policemen spotted his Alaska license plates and wanted to learn something about the territory.

Japanese scientists are displeased because Russia would permit only two of them to enter the country to view the recent eclipse.

Forgotten Eskimo People

Government Scientist Trying To Find Traces Of Early Civilization

A new attempt to find traces of a forgotten Eskimo civilization in the Eastern Arctic will be made by a Canadian government scientist who has sailed for the Arctic aboard the Hudson Bay's sturdy supply ship, Nasopole.

Discovery of bone and ivory implements bearing no resemblance to those used by present-day Eskimos has led scientists to believe that the Eastern Arctic once was inhabited by a strange race, now extinct.

Douglas Leechman, a National Museum anthropologist, will spend several weeks exploring old village sites on the Burto Islands, on the eastern tip of the Ungava Peninsula, in an effort to find some clue to the date and origin of the ancient race.

Horns Must Be Approved

Soft Tone Essential For Cars In Buenos Aires

The city of Buenos Aires, according to a report, will refuse to license automobiles unless the sound of their horns is approved as mellow and soothing. The regulation provided that "all motor vehicles should be provided with horns of a single soft tone, to be determined by the executive department. The use of 'Klaxon' sirens, loud-sounding sharp and dreary or treble-tone horns is strictly prohibited."

The only safe rule is to quit driving for a spell when drowsiness begins to steal away one's alert attention to the full and efficient control of the car.

Export Wheat Markets Will Be Dominated By Canada Until December

Canada will dominate the export wheat market from now until December, states a summary issued by the Dominion bureau of statistics based on returns for the end of the crop year July 31. The only competition of importance facing Canada until December will be from Danube countries.

From December until the end of the present crop year (July 31, 1937) "export competition will be conditioned upon the yields from the crops now planted. Both countries (Australia and Argentina) have acreage planted in excess of 1935 and weather conditions have been favorable to date."

The bureau summarized the wheat situation as follows:

1.—World net imports of wheat and wheat flour for 1935-36 are placed at 494,500,000 bushels, the lowest level in recent years. Production estimates for 1936 in the United Kingdom and Europe are 53,000,000 bushels lower than in 1935. Wet harvesting conditions will probably reduce further the final estimates of production. A moderate increase in world net imports may, therefore, be anticipated.

2.—Canada will dominate the export market from now until December, facing competition of importance only from the Danube countries. Assuming normal yields in the Argentine and Australia in the light of present crop conditions, Canada will face much greater competition from these countries in the latter part of the crop year, than for the same months in 1935-36.

3.—The United States is again definitely out of the export market, and it is now generally conceded that Russia will have no export surplus this year. No Russian offers have been made to date on the improved C.I.F. market.

4.—Prospects for exports to the Orient have remained unchanged during the past month. The 1936 new crop is placed at 45,223,000 bushels, 2,500,000 bushels less than last year. The trade dispute between Japan and Australia will probably yield Canada a larger market than in the past year.

5.—The Canadian carryover of 95,500,000 bushels less than in 1935, plus a smaller 1936 crop, will leave this country with materially reduced export supplies, compared with the preceding crop year. Canadian exports will reach a smaller total in the current year than in 1935-36; due more to the decreased domestic supply, than to the lack of effective import demand. It is likely that the carryover will be further reduced, however.

The Tragedy Of Accidents

Large Number Of Them Could Easily Be Prevented

According to a survey by a leading magazine, fatal accidents are more frequent on the farm than in most city occupations. One reason for this is that factories have regular inspection of machines to forestall accidents. The elimination of dangers in farming is far more of a job because of their wide variety and their deceptive commonness. There are three major and frequent causes of farm accidents: poor repair of farm buildings, careless handling of livestock and improper use of farm equipment. The sad part about all these accidents, is that they are unnecessary. They could easily be prevented.

The little things cause the most tragedy—loose floor-boards, broken stair treads, defective stapled ladders, loose matches, improperly marked poisons, improper use of kerosene and gasoline, not keeping a close eye on the bull in the pasture lot, and so forth.

The remains of the "ghost town" of Frisco, Utah, which in 1870 had a population of 5,000 and produced \$100,000,000 in silver, now stands vacant.

A novel clock in a South American city is in the form of a searchlight. The clock, in revolving, falls on a different landmark every hour.

Will Keep Fewer Horses

Motor Transport Has Its Effect On Royal Arrangements

All the King's horses, or nearly all, are being moved from the Royal Mews at Windsor to Buckingham Palace.

Although the change will be regretted on sentimental grounds it seems inevitable. Gone are the days, seemingly forever, when European monarchs were drawn in full pomp from Windsor Station to the Castle, a distance of but a few hundred yards.

In truth the arrangement will have little effect upon the personnel attached to Windsor Castle. For some years past the famous Windsor Greys have been the only horses kept at Windsor, and many of their former custodians at the castle have already been retired on pension. The royal landaus, used for the driving during Ascot week, will remain at Windsor.

The Mews at Buckingham Palace, where the horses from Windsor will now be kept, were built by George IV.

The development of motor transport has had its effect on the royal arrangements, and King Edward has decided it is not necessary to keep more animals than are needed for state occasions in the Royal Mews in London, with the exception of a few for private riding.

The Windsor Greys were introduced by George V. and have been used on innumerable state occasions. They will be seen again next year when the coronation procession takes place.

Reindeer Experiment

Herd Brought From Alaska Thriving On Mackenzie Delta

A milestone was reached in the experiment the Dominion government is making to provide reindeer for the Eskimo when the report reached Hon. T. A. Cresser, minister of mines and natural resources, that the second year the herd had been on the Mackenzie delta was successful. The animals were in excellent condition and the fawning season which took place in April, May and June, resulted in the addition of 936 fawns to the herd.

The deer, passed through the corals, were counted and the fawns marked. As soon as completed, Dr. J. A. Urquhart, departmental agent and medical officer at Aklatik on the shore of the Arctic ocean, sent a message describing the condition of the reindeer. It showed that the herd brought originally from Alaska and taken kindly to its new reserve. The herd now numbers 3,700 and some 500 of mature steers and aged females will be slaughtered to provide food and clothing. The remainder will be moved to the winter quarters at the south end of the reserve. The original herd reaching Aklatik numbered 2,370.

Plans for the extension of Palgton harbor, the only one in England with a girl harbor master, are being considered.

Britain Has Used Same Crown At All Coronations For Over Eight Centuries

For eight and a half centuries our Kings have been crowned with the crown of St. Edward the Confessor, and as for the coronation of King James II, the new monarch avowed to grant and keep the "laws, customs and franchises" granted by "the Glorious King St. Edward."

So deeply did the mysterious personality of the last ruler of the Saxon royal line impress itself upon the nation that St. Edward's crown is to this day the official crown of England, writes J. G. Noppen in the Daily Sketch.

The monks of Westminster claimed that the pious Edward had bequeathed his regalia to their care in order that future Kings should be crowned with it in the Abbey church, and when William the Conqueror stood at his coronation before the Confessor's tomb it was certainly the reputed crown of Edward that was placed upon his brow.

After the ceremony this crown was promptly returned to the custody of the monks, and so the Abbey church became our coronation church.

There were, however, many other crowns in existence, and, indeed, our early kings were accustomed to carry a set of regalia about with them.

The great coronation crown itself was uncomfortably heavy and could not be worn during a long public ceremony. Even when the King was crowned it was supported on his head, and the honor of assisting in this task belonged in part to the Earl Marshal.

The crown that was broken up and sold by order of Cromwell's Parliament in 1649 was described as "of massy gold weighing 7 lbs. 6 oz." and enriched with rubies, sapphires, emeralds, diamonds and pearls. It was valued at £1,100.

When Charles II. was restored to the throne, the bill of Sir Robert Vyner, the famous goldsmith who supplied the new regalia, came to £32,000. This included two crowns.

The state crowns were often remade for the various kings, and a special one was wrought for King John.

It is, however, a mistake to believe that John lost it in the sands of the Welsh, for it was still in existence in the year 1290.

It was then found in the possession of a dishonest court official named Adam Streiton, together with £30,000 worth of other treasure which he had appropriated!

King Henry V. wore his crown while actually fighting at the battle of Agincourt; and it is said to have saved his life when he was in combat with the Duke of Alencon.

A blow from the Duke's sword chipped a piece off his crown, but did not get through to his head.

Richard III. wore his crown at the battle of Bosworth Field, but it did

not save him, and after he was killed it was placed on the head of Henry of Richmond (Henry VII.) by the famous ancestor of the present Earl of Derby.

Crowns have been made in different forms throughout the ages, and not all have had the now familiar arches surrounding them.

Ancient effigies and pictures of kings often show a crown in the form of a circular band of gold with crosses and lily flowers rising from the edge.

This was perhaps the form of crown which kings usually wore on appearance in public and the carvers and painters would copy it in their work.

The crown of St. Edward may always have been arched, and certainly that with which Henry IV. was crowned was of this form. It would, however, only be seen at coronations, and not be so well known.

St. Edward's crown, which is shown at the Tower of London, was made for Charles II. by Sir Robert Vyner, and the goldsmith was ordered to make it "after the old pattern," of which there would then be some record of memory.

After the coronation the King goes to the Chapel of St. Edward, behind the high altar of the Abbey, and there exchanges the crown of St. Edward for the Imperial State Crown, and his coronation robes for state dress.

A new imperial crown was made for the coronation of George IV, and another for that of Queen Victoria. It was Queen Victoria's crown that was placed above the coffin of George V. for the funeral procession.

Whatever arrangements may be made with regard to the regalia of King Edward VIII, he will, traditionally assume the crown of St. Edward.

Binder Twine Given Good Measure

Very Few Complaints About The Quality In Recent Years

There has been little complaint as to the quality of binder twine sold in Canada in recent years. The law requires that each ball of binder twine sold, whether Canadian made or imported, bears a label showing the number of feet per pound in the ball. These statements as to length, for example 500, 550, 600 or 650 feet to the pound, are checked by inspectors of the Seed Branch of the Dominion Department of Agriculture.

A certain tolerance is allowed under the Act in consideration of variations which naturally must occur. However, of the three hundred samples or more tested annually, more than half have shown a greater length to the pound than the label called for. In samples which did not meet the guarantee, the deficiencies in length per pound were inconsiderable, and only in occasional cases did the deficiency exceed the limit allowed. Since 1930, the proportion of samples found to have shortages has not amounted to three per cent. of the total number of samples tested, the proportion in 1935 being less than half of one per cent.

Good For Business

Dog In English Railway Station Bowed Chocolate Sales

About the last place where one expects to find an animal story is in the page of a company report, but one appeared in such a report not long ago.

At a railway station near London one chocolate machine, for some unaccountable reason, was doing far more business than any of the others. The Automatic Company was gratified but puzzled, and sent down a representative to find out the reason.

The stationmaster's dog, an intelligent Yorkshire terrier, provided him with the solution.

One day the dog had been given a piece of chocolate out of the machine, and had since guarded it carefully, inviting each passer-by to put a penny in the slot, and afterwards share the delicacy with him. His enthusiasm and tail-wagging were generally rewarded.

Scottie Pup Will Liven Things Up!

Household Arts by Alice Brooks

PATTERN 5006

Hoof, mon-ho-ho a wee Scottie that every laddie or lassie would want to cuddle! Now the youngsters will love and admire him for his gay plaid coat, yarn whiskers and soft figure. He's easily and quickly made, too, and stitched in bright, inexpensive cotton fabric, he's a real "scot" treat! Why not send for the simple pattern today, and make Scottie for a truly appropriate gift? In pattern 5006 you will find a pattern for the complete directions for making it, and material requirements.

To obtain the pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

FINE CUT

WORLD HAPPENINGS BRIEFLY TOLD

Arthur Gray, blind newspaper seller, of Birmingham, is studying for the Alabama bar examination.

A state visit by King Edward to Scotland following the coronation next May is under consideration, it has been learned.

Pursuant to its policy of non-intervention in Spain's civil war, the Free State government has banned the export of arms to Spain.

The appointment of Surgeon-Commander Henry Ellis White as honorary surgeon to the king has been announced.

Exports of cheese from Canada during July increased nearly \$1,000,000 over the same month a year ago, according to figures issued by the Dominion bureau of statistics.

Sir Percy Vincent, lord mayor of London, told a luncheon audience in Victoria, if he were 20 years younger and could borrow a few pounds he would come to the Dominion to live.

Jewish tourists who park their automobiles in Poertschach, Austria, and then go for a swim return to find the leather tops of the cars have been cut through in the form of an awastika.

Hardy Bent, who shined the shoes of the late King Edward VII. when he visited Toronto as the Prince of Wales, died at Digby, N.S. He was 80 and had been a bootblack for 60 years.

The London News Chronicle said 60 Galla chieftains of western Ethiopia had appealed to Great Britain to accept a mandate over more than 80,000 square miles in that section of the country.

The United States navy transport Vega brought to Seattle the season's "lake" of Pribilof Island sealskins, valued at \$1,750,000, which will be discharged and divided among the governments of the United States, Great Britain and Japan.

Coal Burned Underground

Russians Trying Out New Idea For Heating Purposes

To save the cost of transporting coal from mine to consumer, the scheme of burning it underground and piping the resulting coal gas hundreds of miles to cities has often been proposed. Now word comes from Russia that the idea has been put into practice, on an experimental scale. After tunnelling through a subterranean coal vein near Lischansk, engineers deliberately set the vein afire, capped the shafts, and installed a piping system to collect the gas. Soon the burning coal pocket became a giant underground retort yielding quantities of gas. The first samples proved of low heating value, but as the underground fire grew in intensity the quality of gas rapidly improved.—Popular Science.

Sorry He Spoke

A beautiful young woman entered the outer office and asked if the manager was disengaged.

"Well, he's rather busy," replied the secretary, doing his best to be complimentary, "but he's always pleased to see pretty girls like you."

"Is that so?" replied the visitor, in a voice which would make a refrigerator feel like a furnace in comparison. "Will you please tell him his wife wants to see him?"

Spent Day To Film Eagle In Flight

Scenes In "The Great Barrier" Are Going To Be Genuine

Two members of the Gaumont British unit, engaged in making "The Great Barrier," Canadian railway building drama, in the heart of the mountains of British Columbia and Alberta, spent one whole day to secure a small "shot" for the picture—an eagle in flight.

Sepp Algeier, internationally famed photographer, and Rudolf Kemmer, guide and mountain climber by profession, set out on an expedition to obtain the desired film and were doubly successful in that they "caught" two flying eagles in one "take" as well as one bird in another length of negative. The views were secured in the rough country near the Kootenay Central line South of Golden, B.C., and naturally these specialists were elated with results although the assignment meant a long tramp through thick forests and an arduous climb before reaching a likely roost where they laid in wait for six hours before the eagles obligingly appeared above them.

To take this picture, too, they had to pack heavy camera equipment as well as ordinary supplies.

The film of the flying eagle could have been faked by the use of a stuffed dummy but "The Great Barrier" is not being made that way—the Gaumont British unit travelled 6,000 miles from London to make the picture in the actual locales of the pioneer construction feat of more than 50 years ago. Incidentally, the eagle "bit" is to be used in the sequence in which Major Hell's Bells is portrayed by Francis MacDonald, decides to follow the flight of a bird in order to find a route for the railway through the mountains. This actual happening brought the name of "Eagle Pass" to the approach when the C.P.R. was being built back in the '30's.

Everhart's solution to these problems is merely to grind the clay into finer particles. This short solution to such a weighty problem is important to concerns in Ohio and other states which use millions of dollars worth of this kind of brick each year, as well as to the manufacturers. Eighty per cent of fine clay products have as their major constituent this flinty clay, found in the coal regions.

Incinerators have been put out of commission because brick popped out of the sides almost as rapidly as they were put to use.

Brick made in the top of the kiln were as much as one-eight inch longer than those at the bottom, although they were all intended to be the same size.

This short solution to such a weighty problem is important to concerns in Ohio and other states which use millions of dollars worth of this kind of brick each year, as well as to the manufacturers. Eighty per cent of fine clay products have as their major constituent this flinty clay, found in the coal regions.

Incinerators have been put out of commission because brick popped out of the sides almost as rapidly as they were put to use.

Brick made in the top of the kiln were as much as one-eight inch longer than those at the bottom, although they were all intended to be the same size.

Everhart's solution to these problems is merely to grind the clay into finer particles. This short solution to such a weighty problem is important to concerns in Ohio and other states which use millions of dollars worth of this kind of brick each year, as well as to the manufacturers. Eighty per cent of fine clay products have as their major constituent this flinty clay, found in the coal regions.

Science Scores Again

Finds Simple Solution To Puzzle Over Heat-Resisting Brick

A simple solution to the 30-year puzzle of the strange, destructible behavior of refractory, or heat-resisting, brick when made from certain types of flinty clay found in Ohio and adjoining States, has been discovered by Prof. J. O. Everhart, member of the research staff at Ohio State University's engineering experiment station.

For three decades or more research workers and manufacturers have had an almost continual headache over the mysterious, and costly, actions of the brick during its manufacture from this clay and have pondered solutions as to why.

Blast furnace operators have placed a brick floor in the bottom of the stack, later to discover the brick floating on top of the mass of molten metal.

Incinerators have been put out of commission because brick popped out of the sides almost as rapidly as they were put to use.

Brick made in the top of the kiln were as much as one-eight inch longer than those at the bottom, although they were all intended to be the same size.

SUNDAY SCHOOL LESSON

SEPTEMBER 6

TURNING TO THE GENTILES

Golden text: I have set thee for a light of the Gentiles. That thou shouldst be for salvation unto the uttermost part of the earth. Acts 13:47.

Lesson: Acts 13:13, 14-18; Romans 10:8-15.

Devotional reading: Psalm 72:6-13.

Explanations and Comments

The People of Lystra Attempt to Offer Sacrifices to Barnabas and Paul. Acts 14:13-18. It had been Paul's custom on reaching a new city to begin his preaching in a synagogue, but at Lystra there were no Jews and consequently no synagogues and Paul began to preach in the open air to the Gentiles. Sitting near by was a man, "who was powerless in his feet, a lame man unable to walk ever since he was born" (Moffatt's translation). Paul saw the man's eager attention and perceived that he had faith to be made whole.

With a loud voice Paul said to the cripple, "Stand upright on thy feet." And he leaped up and he walked. Paul did not often exercise his power like that in the physical order, but in the spiritual order he was doing it all the time. He was giving people new strength of will, a new passion for goodness and a new power of character, and all this through the power of Jesus Christ" (Gaius Glenn Atkins).

The multitude marvelled as they saw the man walking, and they cried in the speech of Lycaonia, "The gods are come down to us in the likeness of men." Greek was the universal language of the Roman empire at this time. In their excitement they abandoned the less familiar Greek in which they had hitherto been conversing, and gave vent to their feelings by shouting in their native tongues, as I often witnessed a Welsh crowd break forth into the vernacular under the stress of circumstances" (Maurice Jones).

Not understanding the Lycaonian language, Paul and Barnabas then evidently returned to their shilling place, while the priest of Jupiter, whose temple was before the city, brought oxen and garlands into the gales and with the multitudes would have done sacrifice.

It was customary for the Jews to express their grief or horror or anger by tearing their outer robes from the neck down toward the girdle. Paul and Barnabas rent their garments as on learning the intentions of the crowd they rushed among them and Paul cried out: "Why do ye these things? We are human beings, men of the same nature as you, and have come to you with good tidings, seeking to turn you from those vain gods and temples and sacrifices to the true God, the Maker of heaven and earth and sea and all things in them." "Until now God had left them to their own ways, he told them, and yet they had not been wholly without knowledge of him, for his gifts had borne witness to him; his rains and fruitful seasons had furnished them food and brought them gladness.

With difficulty Paul thus restrained the people from offering sacrifice to him and Barnabas.

Seeing Tons In Grinding

Capt. Clyde S. McDowell, U.S.N., supervising engineer, estimated the 201-inch eye for the world's largest telescope, to be installed on Palomar Mountain, will lose four tons in grinding at California Institute of Technology, Pasadena.

Simple Crochet--And You're All "Set"

Household by Alice Brooks

Bag and Beret Point Up Any Ensemble

PATTERN 5681

Add a bit of dash to your wardrobe by treating yourself to this flattering beret and bag--so smart in yarn! You'll cherish the simple puff-stitch of its "ruffled" design in no time at all--effortless the beret goes with wire--and be "all set" for Autumn fun. In pattern 5681 you will find instructions for making the set shown; an illustration of it, and of all the attitudes needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (cash preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Not Primitive Affair

Life On Australia Sheep Station Is Very Pleasant

Life on a sheep station in Australia is far from the primitive affair generally imagined by people on the other side of the world from "down under" according to Mrs. Hedley Hardman, whose late husband owned two such stations in the New England district of New South Wales. Mrs. Hardman was a recent visitor in Montreal.

The workers have comfortable cottages and pretty gardens, and there is usually provision for community recreation, such as tennis courts, Mrs. Hardman told a reporter.

Merino sheep were raised on her husband's sheep stations, the "population" being two to an acre. One of the stations was a freehold of 23,000 acres, the other comprised 4,500 acres. The sheep are shorn by electrically-operated shears, the work being done under contract.

Social life among the owners of the sheep stations is most enjoyable, she said. They generally spend a month to six weeks at the stations, for quail-shooting and polo. The Hardman town house was in Sydney.

Mrs. Hardman has travelled in many parts of the world, but she finds Canada one of the most interesting countries she has visited, and was enthusiastic about the variety of the scenery on her route from Vancouver.

A Rare Water-Plant

Grows Only In Australia And Feeds On Insects

Somewhere in a Queensland swamp there is a small rare water-plant which feeds on insects. To do so a specimen of this plant, *Utricularia tubulata*, is the ambition of Professor F. E. Lloyd, Emeritus Professor of Botany at McGill University, Montreal. He has arrived in Australia for the purpose. The plant is perhaps the rarest of the 475 known plants which feed on flesh.

Since it was discovered in 1875 by the botanist Armit not a single specimen of it has been found in any other part of the world. It feeds on minute insects which it entrap with its waving tendrils.

Professor Lloyd has already travelled in the Dutch East Indies, China and Central America in search of rare botanical specimens. He is ready to spend at least a year in Australia in his latest quest.

An Authenticated Record

List Of Accidents Proves There Is Something In A Name

The following was written by Neal O'Hara, in the New York Post: There's something in a name, after all—Hugh Williams, for instance. Here's an authenticated record: On December 5, 1663, the British ship *Menal* founded in the English Channel. The only man to escape was Hugh Williams. In 1785, a schooner crashed onto the Isle of Man. Only one man was saved and his name was Hugh Williams. On August 5, 1820, a pleasure boat sank in the Thames, near London. A passenger named Hugh Williams escaped. And on August 19, 1888, seven men were drowned when a ship from Leeds sank. Two men (an uncle and nephew) were saved. Each was named Hugh Williams.

A dining-room needs a good light for carving. We prefer a knife.

RED CROSS IS WILLING TO HELP IN DROUGHT AREAS

Toronto.—Norman Somerville of Toronto, chairman of the Canadian Red Cross Society, announced the society would care for extraordinary relief cases in the section of the prairie provinces where the Dominion government considers a case of emergency exists.

"The Red Cross gladly accepts the task the Dominion government has asked it to undertake," Mr. Somerville said. His announcement followed the drought statement by finance minister Charles Dunning who said at Ottawa the government would seek Red Cross aid in coping with certain problems resulting from drought.

At the same time Mr. Somerville announced J. W. McConnell of Montreal telegraphed an offer to contribute \$50,000 provided the society is prepared to raise and administer a special relief fund to care for the extraordinary needs of those suffering because of drought in western Canada.

"The government will provide food, clothing, fuel and feed," Mr. Somerville said in a statement accepting the federal drought assignment. "The duty of the Red Cross will be to supply the needs of those of the victims of the calamity to whom sickness has added further burdens, to mothers who have nothing with which to clothe their new-born infants and to housewives whose blankets, mattresses, kitchenware and like articles of household equipment have become wholly beyond further use."

Funds Have Been Restored

Members Of Church Of England Thanked For Co-operation

Winnipeg.—Lost endowments of the Church of England diocese of Rupert's Land, originally estimated at \$758,641, have been restored in full to the revised sum of \$772,070. It was announced here following sessions of church representatives held to discuss details of the restoration campaign.

In a resolution moved by His Grace Archbishop Harding of Rupert's Land, the gathering expressed deep gratitude to the members of the Church of England in Canada who by their work, gifts and intercessions, had contributed their individual shares to restoring the fund.

The resolution was seconded by J. M. McWhinney, treasurer of the fund. Value of securities which remained in possession of the church is still to be adjusted and the question will be placed before the meeting of the executive of the general synod to be held next month in Toronto.

Celebrated Birthday

Lord Tweedsmuir Opens Canadian Pacific Exhibition In Vancouver

Vancouver.—Lord Tweedsmuir and Vancouver celebrated their birthdays together.

Sixty-one years ago the governor-general was born at Perth, Scotland, and on August 26 he opened the Canada Pacific exhibition, climax event of the golden jubilee.

The linking of Canada by a transcontinental railway 50 years ago, His Excellency termed a miracle of which familiarity had dulled our perception.

"In the destiny of Canada," he continued, "Vancouver must play a vital—I had almost said a dominant—part. For she is the window out of which Canada looks toward the east. She is the gateway to the Pacific. She is the chief winter grain port of the world. It is not for me to forecast the future, but it is very clear that the east and the Pacific must play a major part in international affairs."

Wheat Crop In North

Prince Albert, Sask.—This year's wheat crop will put approximately \$15,000,000 in pockets of farmers in the Prince Albert division of the Canadian National Railways, it is estimated here. Local railway officials estimate the division's production of wheat will total 18,177,000 bushels, about 2,000,000 bushels less than last year.

Would Affect Canada

Australian Group Asks That Trade Treaty Be Rescinded

Ottawa.—The proposal to denounce the Ottawa trade agreement between the United Kingdom and Australia, if carried into effect, would indirectly affect Canada because this country enjoys the British preferential rates on some of the goods it exports to Australia. A cable from Adelaide stated the associated chamber of manufacturers there asked that the treaty be denounced.

The trade treaty in force between Canada and Australia was negotiated in 1931 and was in effect when the Ottawa agreements were signed the year following. It was not changed by the Imperial economic conference held here. It was originally for three years and has since been extended.

The largest exports of Canada to Australia such as canned salmon, newspaper and lumber, have definite rates in the Canadian treaty and would not be affected if the U.K.-Australia treaty were killed. Neither would automobile chassis rates but a large number of miscellaneous items Canada is given the British preference whatever it may be and if these were changed Canada would be affected. They include machinery, textiles and other manufactured goods.

Should Be Abolished

Jury In Quebec Inquest Rules Against Level Crossings

Louisville, Que.—A coroner's jury decided level railway crossings should be abolished "wherever possible" to prevent such tragedies as the one that shook this little mill town August 15 when a Canadian Pacific Railway freight train collided with a farm truck and 22 of the two-score occupants were killed.

The official verdict at the inquest was that the 22 villagers met an accidental death.

The six jurors, presided over by Dr. Thomas Caron, district coroner, heard evidence of 23 witnesses, several of whom were survivors of the crash, youths who had jumped or thrown from the truck as it bumped over the crossing on the way home from a political meeting at St. Justin.

Two other suggestions came from the grave little jury after they had deliberated 25 minutes in a small anteroom. One was highway police should apply traffic regulations more rigidly, and the other that applicants for drivers' permits be more closely examined.

Britain Declines To Act

Will Not Take League Mandate Of Western Ethiopia

London.—Great Britain has declined to act on the request of native chiefs that she intervene for a League mandate for western Ethiopia.

Sixty Galla chiefs, in revolt against Italian rule, appealed to the British government to intervene and to accept a League mandate for western Ethiopia. The territory, said to cover 50,000 square miles, includes one of the most fertile tracts in East Africa. It borders the Sudan.

Britain declined to act on the petition, taking the ground that to accept a League mandate would be contrary to her declared attitude in the Ethiopian dispute, namely that she was not seeking material advantage.

Food Supply Not Affected

Survey Shows United States Supply Up To Average

Washington.—The department of agriculture economists said the drought would have little effect upon the United States food supplies from now until the end of next June.

A special survey on "the food situation" by the bureau of agricultural economics said "the supply of food available for domestic consumption will be almost as large as last year."

Taking into account prospective yields and available supplies from the previous season, the report said the total food supply for the period ending June, 1937, would be three per cent. below that of last season and one per cent. under supplies following the 1934 drought. 2166

MENTIONED FOR POST

Hon. Ernest Lapointe, prominent member of the Canadian Government, who is mentioned as the likely successor to Mr. Philippe Roy as Canadian Minister to France.

New Premier's First Move

Duplessis Cuts Own Pay And That Of Cabinet Ministers

Quebec.—One of the first moves of Quebec's new premier, Hon. Maurice Duplessis, after taking office, was to cut his own salary and those of his cabinet ministers. He also announced plans to reduce seasonal indemnities of members of the legislative assembly.

The premier rushed through an order-in-council cutting his salary from \$14,000 annually to \$12,000. His cabinet ministers each received a cut from \$8,000 to \$7,000.

The proposed indemnity reduction is 10 per cent. off the \$2,800 paid to a member for each session of the house lasting more than 130 days. It was estimated the reductions would save the treasury about \$120,000 annually.

Pensions for blind people of Quebec between the age of 40 and 70 years will be one of the first bills introduced by Hon. Gilbert Layton, newly appointed minister without portfolio, he announced.

Death Toll From Heat

Toronto.—Deaths in Toronto in July, boosted by the heat wave, reached an all-time high for a summer month, the board of health was told by Dr. Gordon F. Jackson, M.O.H. Only four months since 1900 have exceeded July's toll. Of the 798 deaths in the city, 242 were directly attributable to heat, said Dr. Jackson.

Professor Honored

Winnipeg.—Prof. J. N. Finlayson, recently of the University of Manitoba faculty of engineering, was honored by members of the engineering profession on the eve of his departure to assume the duties of Dean of the Faculty of Applied Science at the University of British Columbia.

Rains Relieve Drought

But Much More Needed To Bring Back Pastures

Ottawa.—Recent rains have partially relieved drought conditions in southwestern Ontario, southern Manitoba, southwestern Saskatchewan and adjoining areas in Alberta, stated a crop report issued by the Dominion bureau of statistics.

Harvesting, bearing completion, has been generally interrupted by showery weather over the prairie wheat fields. Wheat deliveries were still increasing and would soon reach the peak. Quality was generally good with the protein content extremely high. Yields varied from very poor in the worst drought areas to good in the northern districts, where moisture supplies were adequate for growth. Rust, while widespread, had caused little damage on account of the early ripening.

The report continues: Coarse grains are yielding poorly over the greater part of the prairie and pastures are badly depleted, requiring much more rain to bring them back. Supplies of rough forage are adequate in Manitoba but in the drought areas of Alberta and Saskatchewan, farmers are stacking Russian thistle for winter feed. Some hail damage was caused to late crops in the Calgary and Lethbridge areas by a storm.

Plans Peace Conference

President Roosevelt If Re-Elected May Call Nations Together

New York.—The New York Times reported that President Roosevelt is giving serious consideration, if he is re-elected, to inviting heads of several nations to confer on means of insuring world peace.

If the proposal is carried out, the paper said, Mr. Roosevelt would ask King Edward, Joseph Stalin, Benito Mussolini, Adolf Hitler, President Lebrun, of France, representatives of Japan and China and a few others to meet him at a convenient site. "Mr. Roosevelt feels that, even if the conference amounted to no more than a gesture, it would be a powerful one and certain to delay war if not to avert it for a much longer period," the Times said.

Official Song For Limer

New York.—Miss Ina George, London-born daughter of a sergeant-major in the Royal Fusiliers but a resident of the United States for more than 10 years, has announced that her march song "A Toast to the Queen Mary" had been accepted as official song of the big liner. She also had a congratulatory letter from King Edward, she said.

Bonus For Beet Growers

Lethbridge.—A bonus payment of \$30,000 has come to sugar beet growers from Canadian Sugar Factories, Ltd., bringing to \$2.40 a ton the price paid to date for the 1935 beet crop. And another bonus is expected in October.

LEADERS IN THE SPANISH REVOLUTION

A new picture to reach Canada from the Spanish war zone, shows Felipe Banquer (right), military commander of the Basque zone in Vigo, leaving his office to inspect motorized forces of the rebel army.

CABINET ACCEPTS PLAN FOR MOVING WESTERN CATTLE

Ottawa.—Plans to move young cattle from the drought area of western Canada were announced by Hon. James G. Gardiner, minister of agriculture. The plans cover movement to parts of the prairies outside the drought area as well as to eastern Canada. The minister has submitted his plans to the cabinet and they have been accepted.

Three grades of cattle will be affected by the plan: Yearlings which can be shipped east, wintered and put out on the grass next year, cattle up to two years of age which might be finished during the winter and heifers and cows up to five years of age which might be used as breeder stock outside the drought area.

Applications had come to Mr. Gardiner from Nova Scotia, New Brunswick, Prince Edward Island and the Ottawa valley for cattle from western Canada.

Following are the conditions of the new freight policy:

On carload shipments of feeder cattle and feeder lambs purchased at country points anywhere in prescribed drought areas in Saskatchewan and Alberta and shipped to country points outside these areas in any province in the Dominion, a refund of 50 per cent. of the actual freight charges on the shipment will be allowed if the farmer is still feeding them at the end of three months, two months for lambs.

This assistance will be allowed only on shipments made prior to November 30, 1936, and will be retroactive on any shipments made since August 1, 1936, complying with the conditions.

In the case of cattle, the concession will be allowed only on steers or heifers two years of age and under, except that in the case of female cattle of dairy breeds the age limit will be five years.

To obtain the concession, each car of yearling cattle must contain at least 35 head, and in the case of older cattle at least 25 head. Allowance within these ranges may be made in the case of shipments consisting of both yearlings and older cattle.

To obtain the concession, lambs must be loaded in doubledeck cars, each car containing at least 275 head, all born within 1936.

The concessions will not apply on feed shipments, or on docking, or on other charges against the shipment which may be included in the freight bill.

Under Tourist Exemption

Largest Amount Of Goods Bought In From United States

Ottawa.—Canadians brought into Canada from the United States goods valued at \$798,141 under the \$100 tourist exemption during May, June and July, the national revenue department disclosed.

In May, out of a total of \$118,893 brought in under the exemption rule, \$107,172 came from the United States. In the following month the amount more than tripled, \$316,484 worth of goods coming in from the United States out of a total of \$349,896.

In July there was a slight drop, with \$128,228 coming from the United States and \$41,256 from other countries, a total of \$369,495.

For Greater Defence

France And Belgium Make Plans To Increase Armies

Paris.—France is mapping intensive plans for strengthening her military defences, convinced Nazi Germany is headed toward war. Brussels despatches say Belgium will follow Germany in prolonging the term of obligatory military service, it was predicted following a meeting of a commission named to study defence statistics.

French statisticians estimated 5,500,000 men in Europe, a third of them Germans, would be "ready for war" when Germany's new two-year term of military service becomes effective.

Stony Plain and District.

Miss Mary and Mr Stephen Gamble left on Saturday for their schools at Foothills, on the Coal Branch.

Teacher Val Pailer, formerly at Brookwood school, has taken over the school at Telfordville, and moved down there on Friday.

Ladies will kindly note that a demonstration for their benefit is being given next week at the Cash Store, from Tues., Sept. 8, to Sat., Sept. 12. The demonstrations are on Egg-O Baking Powder and Vi Tone, and are on every afternoon from 2 to 4.

Mr and Mrs Val Mohr, of Mundare, were Sunday visitors with Mr and Mrs John Ducholke.

The Wednesday half-holiday in Stony Plain, when the places of business close, has been discontinued.

A special session of the Local Debaters took place on Monday morning at the s.w. corner of Main and 1st a.w. Owing to one of the said debaters having water on the knee, business was postponed for a week.

Ursel's orchestra have been engaged for the dance at the Winterburn Hall on Friday, Sept. 4.

New and second-hand text books for public and high schools on sale at The Sun Office.

BUTTER AND EGGS WANTED at The Royal Cafe.

C.P.R.'s Streamline Train.

The Canadian Pacific fly plans regular operation of a stream line train, capable of 100 miles an hour, between Edmonton and Calgary. The new train, which is expected to begin scheduled runs later in the month, will "cutacouple of hours" from the present running time between the two cities.

Passengers will get a thrill in riding to Calgary for the first time on the 110 mile an hour "Lightning on Wheels."

If experience elsewhere counts for anything, the C.P.R. is going to find the new flier decidedly popular. Speed and comfort make a great appeal to the modern traveller, even to those who have made a habit of taking long trips in their own motor cars.

Sunday's Drowning Accident

Picknickers and merry-makers who were enjoying themselves at Lake Eden on Sunday afternoon were startled when cries were heard from some fishermen who were thrown into the water when their boats capsized.

Of the party of five, 3 of these were drowned, these being Roy and Arthur Perry and W B Clark, all residents of Edmonton. Two of the bodies were recovered on Sunday evening.

C. N. Train Service.

Trains from the West arrive here Monday, Thursday and Saturday at 4:51 a.m.

Trains from the East arrive here on Sunday, Wed., Friday at 10:34 p.m.

Open Seasons for Game.

Ducks, geese, Sept. 16 to Nov. 1 Hungarian Partridge, Oct. 1—Nov. 30 South of N. Saskatchewan River only.

Grouse, Pheasants and Prairie Chickens—No open season. Deer, moose, Nov. 2 to Dec. 14 Mink, martin, otter, Nov. 1—March 31

Muskrat, Mar. 1—April 30 South of N. Saskatchewan river, no open season. Sunday Shooting is prohibited.

The Lay of the Bishop.

They were at a children's party at the deacon's home. "Our bantam laid a big egg this morning," said one of those present.

"That's nothing," said the daughter of the curate, "our Leghorn laid two eggs in one day last week."

"Huh!" said the Bishop's little girl, proudly, "why, my daddy laid a corner-stone on Monday."

DO NOT FAIL TO REGISTER FOR THE BASIC DIVIDENDS

What Is "Money"?

This thing called money is a very much misunderstood instrument, says the Edison Signal, in the course of an article.

As Sir Norman Angell has said, about the only thing the average person thinks it is necessary to know about money is how to get it—and hang onto it.

The best definition of "Money" has been given to us by Professor Walker, who has said that anything is money that a person will accept for goods and services. It may be a coin, a bill, or a peanut shell. It may, too, be a bank check. As a matter of fact 95 p.c. of the business of Canada is done with instruments other than legal tender as represented by the "legal tender" issued by the Dominion Government.

The Cause of the Coolness.

A Northerner was visiting with an old friend of his in South Carolina who employed a large staff of negroes.

The visitor attended their Sunday service, after which the negro pastor asked him how he liked the sermon.

"Oh, I liked it very well," replied the visitor, "but I think you should preach to your people on the wickedness of theft—stealing fowls and eggs."

The pastor's face clouded and he replied: "Well, sah, I have tried dat way of preaching, but somehow it always seemed to throw a kind of coolness over the meeting."

Britain Going Ahead

In spite of the reduction in parcel post rates, Britain's postal services had a profit of £11,250,000 in the last year. Telephone service, operated by the British post office, had a record income. It is another sign of the way Britain is going ahead.

Gold Production

Production of gold from Saskatchewan and Manitoba sources during June was recorded at 16,078 ounces while the total for the first six months of 1936 was 87,841 ounces as compared to 78,507 ounces in the same period of last year.

The New York Times and the Boston Transcript are the only two daily newspapers in the United States that do not publish comic strips.

Thou Shalt Not Love

— A NOVEL BY —
GEORGIA CRAIG

CHAPTER IV.—Continued

"Yes, you do sound as if you might be the very girl I'm looking for . . ." And then he went on amazingly: "I've been hunting this town over, turning everything upside down, wishing that Fate would send me a girl such as you seem to be. A lovely girl who has been places and seen things, who could take her place anywhere, and probably has, even if she wouldn't want it known—a girl without family ties or other encumbrances, you understand?" His smile twinkled at her a little crookedly. "Beginning to get a little of the way of the cross examination?" And—a girl with sufficient disregard for the conventions to allow herself to be molded into the type I want her to represent. A reckless, heartless, fast-living playgirl!" Again the twisted smile. "I was beginning to believe such a girl could exist only in fiction, but—"

Starr caught her breath sharply looking at him as though searching for the Mephistophelian physical attributes his words intimated might be expected to be discovered. What madness was this? For a fleeting moment Starr feared that the curves of Tut-An-Amen-Ra, mercifully forgotten for a few pitiful moments, was attacking her mind instead of her body. This couldn't be real.

Probably she was still back in the Museum, still under the spell of a painted priestess. She was uncertain whether this whole episode of the cafe of painted women and licentious-looking men—and the man whose very appearance represented to her all she had lost, all she might never hope to grasp—was a fantastic creation of her own imagination.

"Hassan," she had deliberately called him in her own mind, stubbornly putting away the idea that of all the people in the world she had ever seen he least resembled anything or anybody Egyptian or Arab. In that peculiar mood where she had determined to embrace, instead of cringe, from the things Egyptian which had lured her father to his death, she had decided on this name for the man as symbolic for this, her own Arabian Night's tale. It couldn't be anything else. . . .

Idly she wondered what his name might really be. That didn't matter, either, in this tumultuously foolish dream.

She stole a glance at "Hassan's" strong profile, felt the warm pressure of his hand sending tingles of fire through her cold blood. Oh, no, he was not a dream! No Arabian Night's Hassan. Probably somebody called Reggie by his friends, or on the other hand, Bill.

He went on rapidly, as though making the most casual conversation:

"I'll provide you with an apartment, of course, the kind of setting you should have. As a matter of fact—he paused a moment, studying her—"Gad! What an idea! With those eyes, that coloring—all this talk we've been having about Egypt—you're not Egyptian, of course, but what an idea! You could be it, and—"

He stared at her, as if he didn't see her at all, but as if she were some puppet of his imagination he was trying to set into his own little jig-saw puzzle place. "You could forget you'd ever been—"

Starr didn't know why, but she found herself nodding, taking part in the game whatever it was, as she said dreamily: "Forget—forget—" It was a half-hypnotic, mechanical reply. "How much she wanted to forget! The Arabs have a saying: 'In the desert one forgets everything, one remembers nothing any more.' . . . I was in the desert—once."

The man stared at her a moment, half hypnotized himself. "What an actress!" he murmured, the half contemptuous grin came back and he went on in the same cold-blooded business tone: "I'll furnish the setting, yes. I'll introduce you to the right people. I'll make you shine like a diamond. If you fall in with me you won't have a thing in the world to do but play to your heart's content."

WILSON'S FLY PADS

REALLY KILL

One pad kills flies all day and every day for 2 or 3 weeks. 3 pads in each packet. No spraying, no sickness, no bad odor. Ask your Druggist, Grocery or General Store.

10 CENTS PER PACKET

WHY PAY MORE?

THE WILSON FLY PAD CO., Hamilton, Ont.

So that was it, was it? She might have known. "If you fall in with me—"

The same old proposition any girl in the world would have recognized, even as unopinionated a girl as Starr Ellison whose eyes, it appeared, were wide-wake—and were not. Even she could recognize that old thing for what it was. The same old thing merely dressed up in new words!

Starr had thought that there was no room in her tired heart for more emotion. But another worm of bitterness ate in, creeping along, lingering, making itself at home.

Yet in spite of it she found herself considering the offer. This was not the same thing she had been up against at the employment agency. It was quite another matter. No lascivious old beast who wanted to put you in the guise of secretary, who wanted you to "be nice to him." This man—he represented so much of all she had looked upon from afar. He was her own kind. He represented—glamour.

Her hitherto well catalogued thoughts on one subject whirled in a vortex, spun to a centre. Other girls—Girls did sell themselves for less than six months of life. Every day. They thought nothing of it. Why not she, who had so little to lose, so much to gain? This stranger, this New York Arabian Night's "Hassan" who had materialized merely as a tumultuous wish, was offering her everything! He wanted so desperately—except true love, of course. And that she dared not accept from any man, even though it should be offered.

Her voice was brittle as her head lifted with the imperiousness of one of those ancient priestesses she resembled.

"And the price?"

"Hassan" nodded suddenly shocked. As quickly he moved a bit away from her.

"Oh, you mustn't misunderstand me!" He glanced quickly at her, then away, but in one quick glance, decided not to make the bald statement he had intended. He put it in a mild way. "I—er—I assure you I'll not attempt to inflict myself upon you in any—er—unpleasant way. It's a business proposition—merely. You will be on a salary. You see, it will work out like this: All the time you are playing, as you say you want to play, you will actually be working for me!"

"Latak en'ida, offendin'" said Starr softly.

"Have it your own way," said the man, caressingly. "I smile you, too, and you can take it or leave it."

Starr wanted to study him, did not dare. But catching a slanting glimpse of his eyes, she was instantly ashamed of her suspicions. Whatever this man was, this "Hassan" of Broadway, he wasn't that kind!

He wasn't the kind who picked up girls on the street or accosted them in cafes merely because they were alone. He didn't have to. He had that indefinable charm which is irresistible to the opposite sex. Hadn't she felt it all the time when they were dancing—all the time before and after? Starr made a mental guess that her "Hassan" had kept many a debutante sitting by her telephone, drumming her polished fingernails, waiting for his call.

He was waving away the waiter who hovered obsequiously near. His eyes were on Starr. There seemed to be a flash of doubt in them, for all he had said.

"I've got a lot more to say to you," he said. "There's plenty to be explained. How about us getting out of here—my place isn't far away—we can have a bite of supper there, and—and—well, there plenty to talk about. . . ." He was rising. "Let's go."

Starr did not answer, for there was no answer. She was conscious only of the soft clatter of clinking glasses in the place, the muted clamor of traffic outside, the unreality of everything as she picked up her purse, shivering a little, feeling much in a daze as she felt him take her arm and guide her toward the door as though she had no will of her own.

She made only one remark when he settled her in the taxi. She said:

"I'm afraid I won't be a very good companion tonight. I had a grouch when you drifted by. I—I feel just like breaking things."

"Don't let me interfere with any of your childish pleasures," he said, and laughed, cheerfully. "Anything your little heart desires. I've even got a lot of ex-Christmas presents at home you can try your hand on. And the pleasure will be all mine."

CHAPTER V.

Starr did not see the calculating glance Fairbourne gave her in the darkness of the taxi. If there had been any lingering doubts in his mind, this simple acquiescence to going with him wherever he led fished that. His conscience was clear. And why not, he argued to himself, seeing where he had at last caught up with her? She might have her own racket, but at least she was new enough at it for it not to stick out too plainly, and he could mold her to his own wishes.

They got out before the low doorway of an old-fashioned house, one of those obviously made into bachelor apartments of the smarter class. He led her through the doorway lighted by the two placed iron lanterns that beckoned a welcome. The ivory and the plum comfort of the entrance enveloped them and the small automatic elevator let them out before a door painted ivory and with a brass knocker. He didn't use it; rapped with his knuckles.

A Japanese serving man opened the door and they went through a hallway, all dark woodwork and lined walls, to a big living room where a fire burned on the hearth where once had been a grate.

"This is well enough for a bachelor," he said, with a touch of disdain. "I hope Egyptian princess can make herself at home."

(To Be Continued)

Scientific Work in North

Arctic Patrol Has Not Been Hindered By Adverse Weather

In an interview at Churchill Major McLeod, in charge of the Canadian government eastern Arctic patrol on the R.M.S. Nasopole, stated that the administrative and scientific programme of the patrol had not been delayed or hindered by weather or other conditions since entering Hudson's Strait.

Mr. Ney and his assistant, Mr. Courtwright, had transferred to the P.S. Fort Garry at Port Burwell for the purpose of establishing astronomical stations in the Ungava bay area.

Messrs. Macdonald and Nichols were left at Wolstenholme to continue their investigations on the mainland of Quebec and the nearby islands.

These scientists will be taken on board the Nasopole and continue their work as far north as Craig harbor, returning to Ottawa with the other members of the patrol.

Was Famous Singer

Sir Henry Lytton Last of A Century In Opera World

Sir Henry Lytton, last of the old Savoyards, died at his home in London after a long illness.

He was 69 years old and had spent more than a half century singing a wide variety of roles in Gilbert and Sullivan operetta.

His appearances with the D'Oyly Carte company, of which he was a member during most of his career, brought him fame as one of the finest light opera singers ever to play the Savoy operetta.

He appeared in the productions more than 18,000 times and 5,000 performances of "The Mikado" alone.

"I've got a lot more to say to you," he said. "There's plenty to be explained. How about us getting out of here—my place isn't far away—we can have a bite of supper there, and—and—well, there plenty to talk about. . . ." He was rising. "Let's go."

The British board of education will provide for periodic overhauls of bicycles used by schoolchildren.

The British postoffice handles more than six billion letters and parcels annually. 2100

Inflamed, congested kidneys cannot properly filter your blood. Correct this condition before serious rheumatic trouble develops. Soothe and strengthen your kidneys with

GIN PILLS
FOR THE KIDNEYS

Little Helps For This Week

A soft answer turneth away wrath, but grievous words stir up anger. Proverbs 15:1.

Renew Thine image, Lord in me, Lovely and gentle may I be; No forgiveness or peace to mine eyes dear; No anger mayest Thou ever find, No pride in my unruffled mind, But faith and heaven-born peace be there.

Neither say or do ought displeasing to thy neighbor; and if thou hast been wanting in charity, seek its forgiveness or speak to him with gentleness. Injuries hurt not more in the receiving than in the remembrance. A small injury shall go on it comes, a great injury may dine or sup with you. Why should you vex yourself because another has wronged you? Grief for things past that cannot be remedied, and care for things to come that cannot be prevented, may easily hurt and can never benefit you. Therefore commit yourself to God in both, and enjoy the present.

Man Without A Country

Former Russian Leader May Be Forced To Leave Norway

Indications are that Leon Trotsky, former Russian revolutionary leader, might soon be returned to his usual status of a man without a country. The wandering, sickly Bolshevik is to be expelled from Norway, Government sources said, if charges of new international intrigue are proved against him. At the same time, Pravda, Moscow Communist organ, made clear that there would never be hope for reconciliation between Trotsky and Stalin.

Banished from his own revolutionary land and exiled from many others, Trotsky accepted refuge in Norway with the promise to refrain from propaganda or other international activity. Recently young Norwegian Nazis broke into Trotsky's home at Honesdaalen and found papers which they said dealt with plots in France and Spain. They handed them over to police.

Trotsky entered Norway June 18, 1935.

Modern Magic

Aladdin's magic with a lamp is being approached by modern industrial engineers, who have invented a light which continues to shine after it has been extinguished. Introduced during a homefurnishings exposition in the Merchandise Mart at Chicago, the light has a chemically treated shade which continues to glow for several hours after the electric bulb is turned off.

While the outside temperature stood at 103 degrees, a drinking fountain in the post office at Findlay, Ohio, froze. Postmaster W. T. Ault said the mechanism had gone "haywire."

According to a trade journal there is a distinct boom in new cars. And usually a distinct rattle in old ones.

Get the new large economy size—Also available in smaller, regular size.

MINARD'S LINIMENT

"KING OF PAIN"

GET THROUGH

MORE POWER

This tire gives you higher average speeds in field or on open road.

SELF CLEANING

The only tire that actually cleans itself as it revolves.

TRACTION FORWARD OR BACKWARD

Truck, tractor, or grader does more and better work.

slippery mud deep snow

The new Goodyear Lug Tire for trucks (above) bites into soft going with a caterpillar action—gives traction forward and backward—cleans itself automatically—pulls you through. Yet it is fast, smooth and quiet on pavements. The tread is tough and long wearing.

The new Goodyear Studded Tire (left) is designed for cars that must face the mud-holes of unpaved roads, the hazards of cross-field driving, and deep winter snowdrifts. Come in and see this tire. Tried and proven on gumbo roads and through deep snow. It is the same low price as the Goodyear All-Weather Tires.

GOOD YEAR

Explaining the Difference.

There are a great many people who confuse Prosperity Certificates now in use with the non-negotiable certificates which will be used when social credit is established, says a writer in Edmonton Journal.

The difference between these two mediums of exchange is of vital importance to the merchants of this province, because any merchants who refuse to register will automatically debar themselves from accepting non-negotiable certificates, because being non-negotiable these certificates cannot be passed around like the Prosperity Certificates, the only outlet being thru the Merchants' Dividend Account of the State Credit House, and if the merchant had not registered he, of course, will have no account.

Think this over carefully, Mr. Merchant, and remember there will be hundreds of thousands of dollars worth of dividends distributed and if you do not register, you are closing your door against this business, and it will mean just one thing for you, bankruptcy, and then the Chamber of Commerce will not help you any. It is up to you. Now is your chance to register.

How Wisdom Comes.

We learn wisdom from failure much more than from success. We often discover what will do by finding out what will not do; and probably he who never made a mistake never made a discovery.—Samuel Smiles.

Mr. Christie L'ard From.

Word received here on Monday from Chilliwack indicates that Mr. James Christie, the former Stony restaurant, has had a very successful season in R.C. Mr. Christie has been operating a service station, lunch room and row of cabins for the convenience of traveling motorists. He is said to have had some strong opposition, but, notwithstanding this, has succeeded in making it a "go." What helped pretty considerably was the fact that this was Jubilee year in Vancouver, and that a big percentage of the traveling public passed thru Chilliwack, which is situated about 60 miles from the City of Vancouver.

Moving the Tennis Courts.

Alterations to the layout at the Fair Grounds is now in progress, this consisting of the shifting of the lawn tennis courts to a point farther south, to allow of more space for the hardball diamond, and, more particularly, for the new diamond for the softball players. The matter had been under discussion for some time, so at the last meeting of the Sports Club the sum of \$65 was allotted for this purpose.

Contractors Gus Barth and H. Ostway have been superintending the alterations.

Christian Science.

All Christian Science Churches next Sunday, the subject of the Lesson-Sermon will be "Man." The following is one of the Scriptural quotations contained in the Lesson-Sermon: "And God said. Let us make man in our image, after our likeness; and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth. So God created man in His own image, in the image of God created he him; male and female created He them" (Genesis 1: 26, 27). One of the correlative passages from "Science and Health with Key to the Scriptures" by Mary Baker Eddy, is as follows (page 94): "Man reflects infinite Truth, Life, and Love. The nature of man, thus understood, includes all that is implied by the terms 'image' and 'likeness' as used in Scripture."

Advice.

In the elevator of a big store in the City, he noticed a very attractive poster advertising beauty treatment. Out of curiosity she asked the elevator attendant (a funny little Cockney) where the beauty parlor was.

He turned and gave her a good look, noticed presumably that she did not use makeup at all, and then said: "You don't want to go there mucking your face about. Why not stay as y're—plain but 'olesome'?"

NOW A NEW BIGGER BAR

MORE SOAP AT NO EXTRA COST

The new Sunlight Soap—is the same pure, quick-dissolving soap that has lightened the wash-day burden of millions of housewives... the only soap with a \$5,000 guarantee of purity... easy on the clothes and hands. Ask your dealer for the new, larger Sunlight bar and save money.

Now a bigger bar in a single carton. The 4 small bars in one carton will no longer be obtainable.

A PRODUCT OF LAYTON BROTHERS LIMITED

3. HOW TO LAY OUT THE FIELD

No insurmountable problem faces you when you come to consider laying out your Skeet field. Any piece of waste land will answer the purpose. It should face northeast, and a good, clear background is essential in order that you may see the flying birds distinctly. Dimensions should be 300 by 600 yards, and the actual shooting stance should be on firm ground, although the balance of the area, the danger zone, may be swamp, water, or dry land.

Probably one of your members could suggest a piece of ground which he has not been able to use, and which he would be willing to lend to the club. If not, a good field may be obtained for a low rental, which will be covered by the earnings of the club during the year.

The general plan of a Skeet field is shown in the accompanying diagram, and is reproduced in the handbooks at the top of each of these articles.

Imagine a huge wheel cut in half, with seven spokes radiating exactly thirty degrees apart. Standing on the hub—which is Station 8—and facing the rim, the first point to the right, where the spokes would intersect, is Station 1. Move thirty degrees to the left along the rim, and you have Station 2. And so on to

Station 7, which is the extreme point on the left end of the rim, opposite Station 1, and in direct line with Station 8.

Stations 1 and 7 are 40 yards apart. Station 8 is, of course, exactly half way between them. A twenty-yard cord, fastened at one end to Station 8, will mark off the complete semi-circle from 1 to 7. It is an easy matter to mark off the rest of the Stations along the rim of the semi-circle, remembering that Station 4 is immediately facing Station 8. It will be found that the Stations along the rim are approximately 31 feet apart from each other.

At Stations 1 and 7 are located the traps. The high trap, 100 feet from the ground, is located at Station 1, and the low trap, 3 feet from ground, is placed at Station 7. More about these in our next article. Watch for it.

One last word. Posts should be firmly planted at each Station, plainly marked with the number. This comprises the layout of the field. Planked or cinderpl walks and stands may be constructed, if and when you desire them. Of course, the amount of finishing in this respect will depend entirely on the tastes and resources of the members.

This is No. 3 of a series of 12 articles on Skeet Shooting. Cut it out, when all have been shipped, you will have a complete write-up of this sportman's sport which is rapidly becoming the vogue across Canada.

Your Co-operation Required.

Membership in the social credit party is not necessary, although co-operation with Credit principles is required, for basic dividends, Premier Aberhart is reported to have said Friday, in further elaboration of his remarks in the Throne debate in the Legislature.

"What is the meaning of the term, 'The Social Credit idea'?" the Premier was asked.

"That is co-operating with your fellow men. He makes sacrifices for your benefit and you make sacrifices for his. It means to co-operate most heartily. It does not mean that a person has to belong to the social credit party," said the Premier.

The Premier was asked what was considered a bona fide citizen.

A person who was a voter was a bona fide citizen and had the right to register, he said.

Ask Amendment to C.C.C.

Amendment of the Criminal Code to prohibit those under 16 years of age from carrying fire arms, and that no ammunition be sold to anyone under 16 years of age, will be sought by the Saskatchewan Fish & Game League, it was decided at their convention recently held in Regina.
